

TapTick – Habit Tracker

Surface Plane – High fidelity

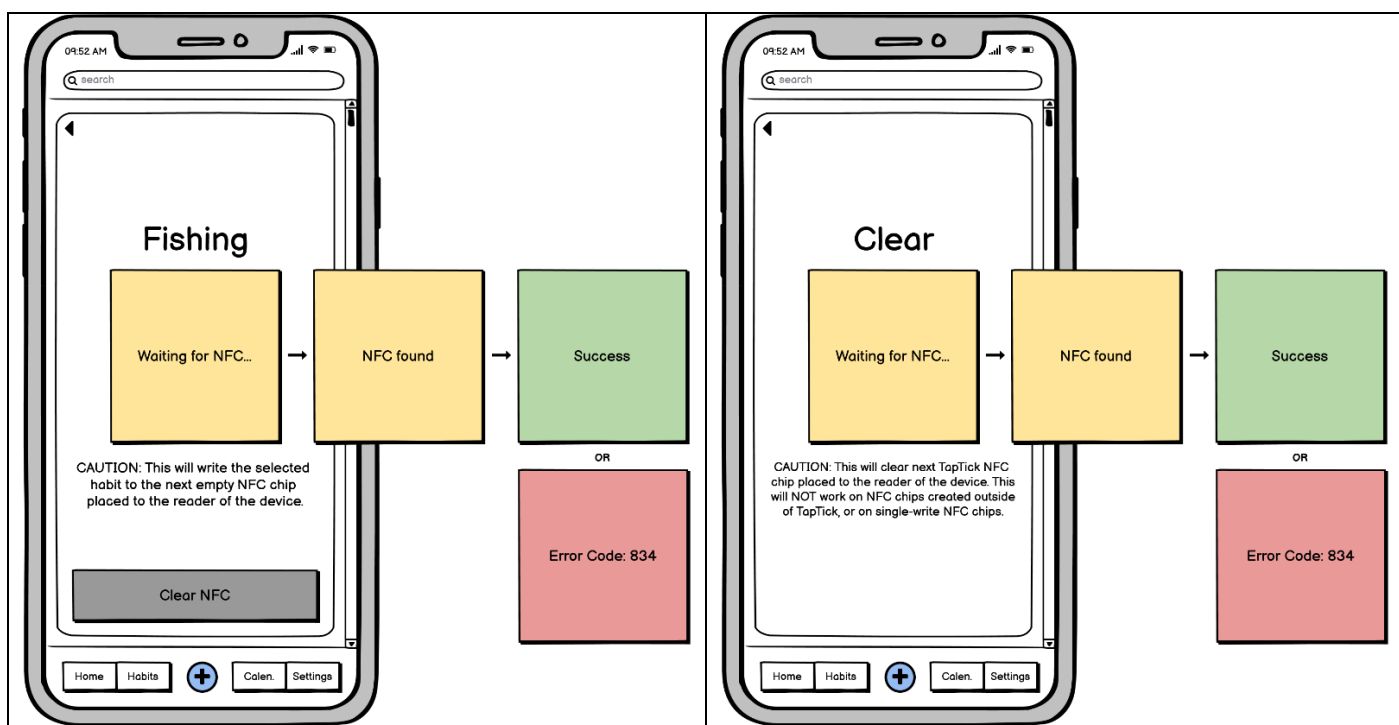

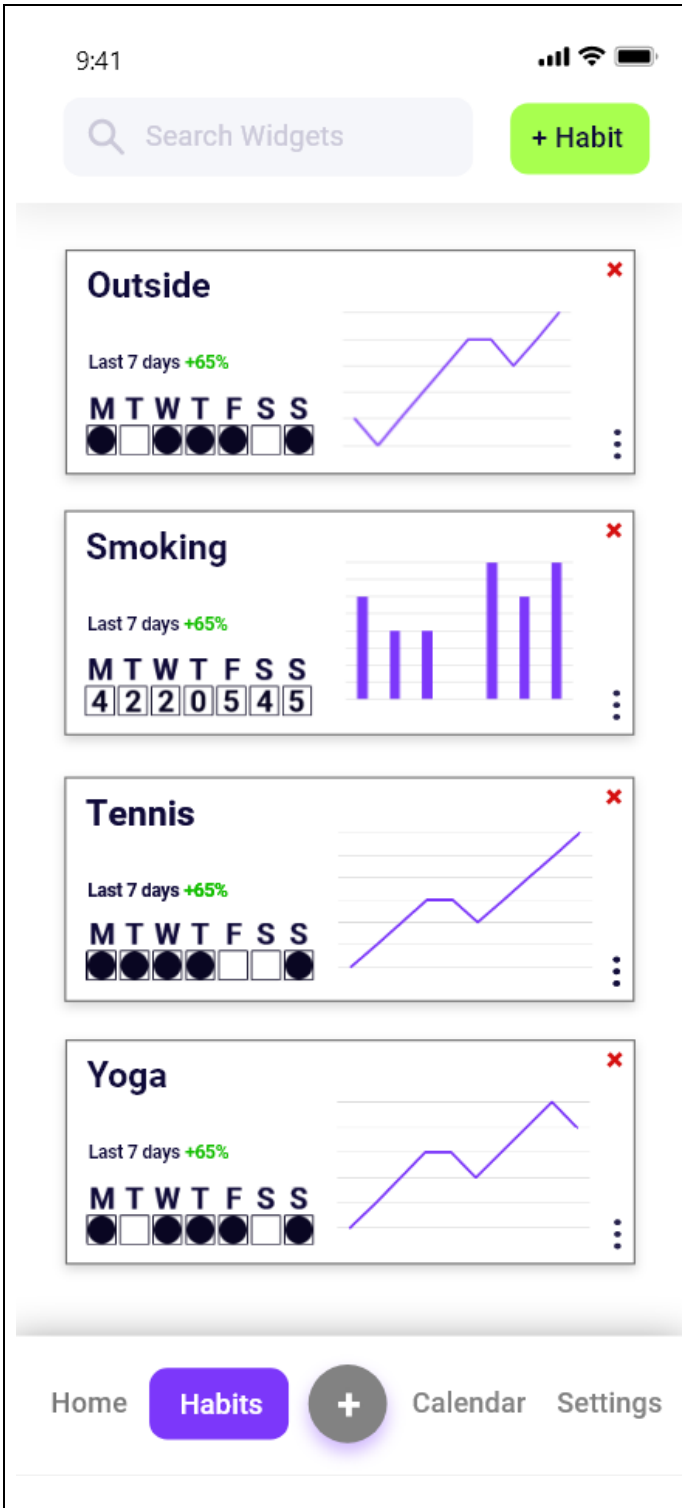

Surface Plane – Low fidelity

Walkthrough – Writing and clearing an NFC habit chip.

All Habits:

Iteration 4: User survey identified the previous 'new habit' button's size required a large amount of room when this could be utilised for displaying of habits. The 'new habit' button was updated to a smaller '+Habit' button in the app header.

Add Habit:

Iteration 4: TapTick's prominent mental health support role led to a reconsideration of 'Habit Type' categories. These names were revisited to discover more mindful ways to word 'good' and 'bad' habits but were unsuccessful. The decision of 'neither' replaced the previous 'neutral' was made to make this option inclusive of users that did not wish to label their habits as either of the former.
